

Zendo Serving Pattern

1. The 3 servers arrive at positions 1-3 simultaneously and serve along arrows. If there are 4 servers then the fourth server begins at the Ino position.
2. Serve people in pairs whenever possible.
3. When serving, only take the 2nd (soup) bowl into your hand, but not the 1st or 3rd bowls.
4. Serve each segment (gomasio, food, water, buckets) continuously and bow together outside the zendo at the end of each segment (not at the end of each pot)
5. If you spill something, let the soku or head server pick it up with the kentan towel.
6. When serving seconds, servers walk **briskly** to positions 1 & 2 and walk at a **normal** pace towards each other, only stopping to serve if someone has hands in gassho.
